## **Question**

**Why 88182-88181 shelf life only 1 year?**

## **Reply:**

Refer to the battery shelf life for #88182/88181, as you know that any battery which installed on the instrument will self discharge by time.

For the battery we use on 88182, it is Sony CR2032 battery and 2 years lifetime promise from vendor, so, it means it can be longer but no promise.

By considering our and your inventory storage time, we shorten the battery life time to 1 year and it means we hope customer can activate and finish the logging within one year after they purchase the logger for your reference.
