### Question

I lost the windshield of my Sound Level Meter, can I use without it?

### Reply:

A windshield is an important accessory for sound level meter.

We recommend to use your sound level meter with it for both indoor and outdoor while taking measurements.

The advantages to use the Sound Level Meter with windshield are:

1. Reduce the effects of wind & air movement across the microphone
2. Protect the microphone from damage
3. Keep the microphone capsule clean
