**Question**

Can I have my 8952 probe with length scale?

**Reply:**

We have another product, model AZ8905 mini vane anemometer is with length scale on the probe, while user taking the measurement, the scale is actually not able to be seen clearly. Therefore, on model AZ8952 hot wire anemometer, we had provided extra O-ring as accessory (20pcs/set) for user to measure the required length and located the O-ring on the probe in advance as below image:

<p><b>Laser marking on AZ8905</b></p> <p>Not able to be seen clearly on the length scale while taking measurement</p>	<p><b>Accessory O-ring on AZ8925</b></p> <p>Measure the required length(ex: 15cm &amp; 30cm), located the O-ring on probe before taking measurement Clearly visible while taking measurement</p>
